

Types of Cameras Resource Page

The following websites will assist you in learning about the various types of cameras available today. The one type of camera that may cause some confusion is a Compact. In years past, a compact camera referred to a Point and Shoot style camera. In 2012, a new type of camera was developed, also called a compact or a mirrorless camera with interchangeable lenses. In this class, when we refer to a Compact, this is what are talking about.
